## MaRITeC-X Centre of Excellence

- » Establish Cyprus as an Eastern Mediterranean Centre for Research, Innovation, Technology and Entrepreneurship in Blue Growth
- » Enhance the competitiveness of Cyprus & EU Blue Economy
- » Support the overall Smart Specialization Strategy of Cyprus (S3CY) and the European priorities with competitive advantages to the Cypriot economy
- » Create a critical mass of infrastructure and human capital in the region

**“MaRITeC-X: Our own Marine and Maritime Research Innovation and Technology Centre of Excellence”**

**Aquaculture**

**Ocean energy**

**Offshore oil & gas**

**Coastal and maritime tourism**

**Blue biotechnology**

**Knowledge critical mass.** We aim to reach a critical mass of academics, researchers and specialized professionals that can unlock existing and new scientific potential in marine and maritime research.

**Thriving blue economy.** We are pushing for a thriving maritime circular economy ecosystem where local economic factors such as SMEs, start-ups and industry can harness the market opportunities to achieve economic recovery, competitiveness and sustainable growth.

**Society and the sea.** We aim to increase societal engagement with the sea by promoting the maritime heritage for an island country like Cyprus.
